Summary

Python Developer with hands-on experience in backend development, REST APIs, Flask, Django, SQL databases, and Machine Learning. Experienced in building scalable web applications and AI-based solutions through internships and academic projects. Strong foundation in Python, data structures, object-oriented programming, database design, Git, and software development best practices. Passionate about developing efficient, secure, and user-centric applications.

Education

Bareilly College, Bareilly

Bachelor of Computer Application
Aug 2022 — Aug 2025

Technical Skills

Python, Flask, Django, HTML5, CSS, Javascript, SQL, User Interface, Git, GitHub, OPP, JWT, Problem Solving, API Integration

Soft Skills

Collaboration, Problem-solving, Communication, Time management, Result-oriented

Additional Skills

Public Speaking, Writing, Research

Languages

English, Hindi

Certifications

- Certified Web Professional-Python Developer

Work Experience

Edunet Foundation (IBM SkillBuild)

Jun 2025 — Jul 2025

Artificial Intelligence & Machine Learning (AIML) Intern

Completed an AI & Machine Learning internship, developing an Employee Salary Prediction model using Python and Scikit-learn. Gained practical experience in data preprocessing, model building, and data visualization.

- Completed a 6-week AI & Machine Learning internship.
- Developed an Employee Salary Prediction model using Python and Scikit-learn.
- Performed data preprocessing, feature engineering, and model evaluation.
- Visualized insights using Matplotlib and Seaborn.
- Worked with regression algorithms and model performance metrics.
- Collaborated with mentors to implement ML workflows. reduction process which helped improve research analysis time by 40%.

Python Technology Stack Intern

Jan 2026 — Mar 2026

Infosys Springboard

Completed a Python development internship focused on backend development, database integration, and building scalable applications. Developed the SmartStock Inventory Optimization System using Python and SQLite.

- Developed SmartStock Inventory Optimization System using Python and SQLite.
- Designed relational database schema for inventory management.
- Implemented CRUD operations for products and transactions.
- Built inventory tracking and stock alert features.
- Used Git for version control.
- Improved debugging and backend development skills.

Projects

Feb 2025 — Apr 2025

ATM Management System

Developed a desktop-based ATM Management System using Python, Tkinter, SQLite Implemented secure login, account registration, balance enquiry, cash deposit, withdrawal, PIN management.

- Developed a desktop-based ATM Management System with secure user authentication and account management.
- Implemented core banking features including balance enquiry, cash deposit, withdrawal, fast cash, and PIN change.
- Applied object-oriented programming (OOP) principles to develop a modular and maintainable application.
